-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 18 May 2007 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims are rejected under 35 U.S.C. 103(a) as being unpatentable over Herbst et al (US 6,022,337) in view of Malmin (US 3,974,831).

Herbst teaches a disposable dental injection kit comprising a flexible conduit (19), a source of anesthetic fluid (21), a needle handle (15), a needle (102), and a connector (105) for attaching the needle to the needle handle. Herbst does not disclose a pierceable seal in the connector. Herbst does disclose the use of a rubber pierceable seal when connecting the tube to the source of anesthetic fluid (Fig 7). Malmin teaches a double ended needle (44) which is attached to a needle handle (40) by piercing an elastomeric seal (20). It would have been obvious to one of ordinary skill in the art at the

Art Unit: 3767

time the invention was made to use the seal of Malmin in order to prevent any fluid from leaking from the needle handle or conduit prior to connecting the needle. As to claims 3-6,10-13 the shape of the seal would be a matter of obvious design choice since any shape would be expected to perform equally well; as to claim 7, see threads 26 and 27; claim 16-28, Herbst Fig 8-10.

4. Claims 8,9,14,15,and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herbst and Malmin as applied to claim 1 above, and further in view of Teringo (US 5,026,345).

Herbst and Malmin do not disclose the use of an adhesive. Teringo discloses the use of cyanoacrylate in a syringe. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use an adhesive to attach the seal as it has been proven successful in the art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth R. MacNeill whose telephone number is (571)-272-9970. The examiner can normally be reached on 9:00-5:30 M-F.
